

Impact of Federal Budget and the US Government Priorities on Research at Universities

Moderators

Chuck Bunting, Associate Dean of Research and Sponsored Programs
Oklahoma State University

Vahid Motevalli, Associate Dean for Research and Innovation
Tennessee Tech University

Premise

The impact on the universities may vary due to the differences in the universities, such as their size, research activities, location, etc.

Groupings

- ***Land grant universities, very high research in science and engineering, NO medical schools***
- ***Land grant universities, very high research in science and engineering, with medical schools***
- ***Public or private universities with more than 120 faculty in engineering***
- ***Public or private universities with less than 120 faculty in engineering***

Questions for all groups

- 1. What is the impact of uncertainty in the Federal R&D budget outlook (due to continuing resolutions and ultimate negotiated budget between the Congress and the Administration) on universities in your category?**
- 2. How have the changes in the Federal R&D budget priorities between the previous and current administration impacted your university?**
- 3. What are three key areas the US Government priorities impact your universities (e.g. graduate studies support, research capacity building, etc....)?**
